

XXII NATIONAL CONGRESS OF BIOCHEMISTRY

Next-Gen Biochemical Challenges Across Borders

24–26 October 2024 | University of Aveiro, Portugal

Jointly organized by The Portuguese Biochemical Society and the University of Aveiro

FERNANDO CORRALES

Fernando J. Corrales obtained his BSc in Biological Sciences (1986) and his PhD in Biochemistry and Molecular Biology (1992) from the Universidad Autónoma de Madrid. After a post-doctoral period at the University of Cambridge (UK), he joined CIMA, University of Navarra, where he has been Professor of Biochemistry and Head of the Proteomics, Genomics and Bioinformatics Unit since 1999. He is currently a Senior Scientist and Head of the Proteomics Laboratory at the Centro Nacional de Biotecnología. He is an active researcher in the field of biochemistry. His interest is now focused on the study of the mechanisms related to liver function as well as those involved in the progression of liver diseases using proteomics. His research activity has been regularly supported by regional, national and international grants and has led to the publication of more than 190 scientific articles (H=36; more than 3900 citations per year). He is a member of the editorial board of several journals specialized in proteomics and hepatology, general coordinator of the Molecular and Bioinformatics Resources Platform and ProteoRed-ISCIII (Spanish Proteomics Network), founder and vice-president of the Spanish Proteomics Society, and has been a member of the Executive Councils of the European Proteomics Association and the BD and C-Human Proteome Project, as well as PI of the Human Liver Proteome Project and the Spanish Chromosome 16 Human Proteome Project. He received the Juan Pablo Albar Proteome Pioneer Award from the European Proteomics Association in 2022.
